

# Hi-Power V

## Electro-hydraulic Valve

**COST SAVING & EFFECTIVENESS  
BEYOND YOUR IMAGINATION**

### Key Features

- Electro-hydraulic valve
- Digital and analog display
- High-torque and high-efficiency
- Low power consumption
- Selectable input/output signal
- Water proof (IP68) & explosion proof type (Exd II CT5)

### Certification

# The BEST solution for BWTS retrofit

Did you know **Hi-Power V** can save much more installation cost than VRC modification in BWTS retrofit for below reason?

- Minimum installation work **without** existing VRC modification
- No additional utilities required
- Only power & signal cable required for installation of Hi-Power V
- Easy & quick Installation
- Fully interfaced & controlled by BWTS controller

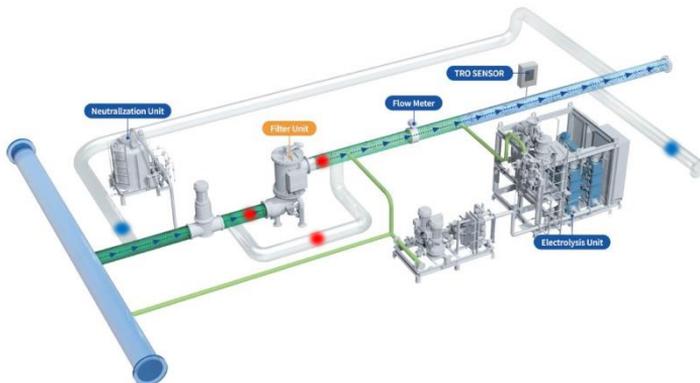

## With *HiBallast*

**Hi-Power V** has many references with **HiBallast** retrofit and has proven its cost saving effects. It is perfectly interfaced and easily controlled by HiBallast during ballasting and de-ballasting operation.

## Hi-Power V With Other BWTS

- Broad compatibility with other BWTS makers
- Enabling one-click for ballasting & de-ballasting automation

Mark  : VRC modification points with additional valves  
Mark  : Valve replacement for remote control (or automation)
